As an addendum to my application for a permit to construct, alter or repair an on-site sewage disposal system, I am requesting approval to install the septic tank and use it as a temporary holding tank in accordance with Oregon Administrative Rule 340-71-160(7). I am submitting the completed pumping contracts as required.

By my signature, I certify that I understand and agree to the following conditions.

1. The tank outlet must be sealed with a watertight seal, and an inspection of the tank installation performed before connection of plumbing to the tank.
2. It is the responsibility of the property owner to maintain the tank in a manner that precludes the discharge of sewage onto the ground surface.
3. I agree to allow representatives of the Linn County Environmental Health Program access to assess the status of the tank maintenance at any time.
4. The maximum length of time for which a septic tank can be used as a temporary holding tank is twelve months.
5. Failure to properly maintain the tank resulting in discharge of sewage is a violation of Oregon law and this agreement, and will result in enforcement action.
6. Failure to satisfactorily complete the system, including the soil absorption system (drainfield) within the year in which this approval is in effect will constitute a violation of Oregon law and this agreement, and will result in enforcement action.
7. Any enforcement action initiated per numbers 5 or 6 above may involve a citation to appear in court and the assessment of a fine.
